

Capital for Colleagues become members of the Irish ProShare Association

The Irish ProShare Association (ProShare) represents organisations which are, or are looking to become employee owned businesses.

As a not for profit, independent voluntary organisation with a reach across Ireland, they work closely with their members to promote the business case for employee ownership. In addition ProShare is engaged actively with policy makers, the media, Government and other industry bodies to help gain agreement that employee ownership should form part of the economic strategy for future productivity and jobs growth. The UK economy has demonstrated that 4% of GDP, representing £30bn, has been delivered successfully by employee owned businesses.

Capital for Colleagues has invested in a number of employee owned businesses in the UK as well as TPS Investment Holdings Limited which is involved in the sourcing, marketing and distribution of a specialist range of pipes, valves, fittings and other associated products for the public utility markets throughout Ireland.
